MAIN DATA	
Continuous power (PRP)	340.00 kVA
Continuous power (PRP)	272.00 kW
Emergency power (E.P.)	375.00 kVA
Emergency power (E.P.)	300.00 kW
VAC - HZ - cos(fi)	208 - 60 - 0.8

DIMENSIONS AND WEIGHT		
Width	1260	mm
Length	3000	mm
Height	1940	mm
Weight	2770	kg

ALTERNATOR	
Description	MECC ALTE
Alternator model	ECO38-3LN/4
P.R.P. Power	380.0 kVA
E.P. Power	402.0 kVA
Connection	Parallel star
Phases	3FN
Winding	12STD
Terminal Number	12 nr.
IP Protection	23
Electronic regulator	DSR
Precision	1.0 ± %

BASEFRAME	
Model	T3
Standard tank	900
Optional tank	0
Oversized tank*	0 1

CANOPY & SILENCER		
Canopy model	SENZA COFANO	
Silencer model	MS 30	
Silencer outlet diameter	140.0	mm

Standard reference conditions temperature 25°C, altitude 100m asl, relative humidity 30%. atmospheric pressure 100 kPa (1 bar), power factor 0.8 lag, balanced load - non distortional. Fuel consumption is nominal and refers to specific weight 0,850kg/l. Sound obsorbiolal. Tele Consumption is infinite and refers to specific weight 0,50kg/i. Southern power values refer to free field conditions: the installation site may influence the values. Dimensions, weights and other specifications contained in the technical data sheet and related attachments are nominal, subject to tolerances and refer to the model with standard equipment; any optional and additional equipment/accessories can modify weight, dimensions, performance. P.R.P. Prime Power-Continuous power at variable load: dimensions, performance. P.R.P. Prime Power-Continuous power at variable load: The power that a genset can supply in continuous service at a variable load for an unlimited number of hours per year while respecting the maintenance intervals established in the environmental conditions stated by the Manufacturer. according to ISO8528-1. The average power supplied over time and any applicable overload must be less than the percentages stated by the Manufacturer. E.P. - Emergency power: This is the maximum power that a generating set can deliver for a limited number of hours per year while complying with the maintenance frequency stipulated under the environmental conditions set by the Manufacturer. The number of hours per year is determined by the engine manufacturer. The average power output over time must be lower than the percentages set by the engine manufacturer. Overloading is not allowed.

The data contained in this document is nominal and refers to the standard equipped model and is not binding. Visa S.p.A. reserves the right to revise the information without notice per our policy of continuous product development and improvement.
