MAIN DATA Continuous power (PRP) Continuous power (PRP) Emergency power (E.P.) Emergency power (E.P.) 460 - 60 - 0.8 VAC - HZ - cos(fi)

Sound pressure 7 m.

Silencer outlet diameter

DIMENSIONS AND WEIGHT		
Width	1600	mm
Length	4810	mm
Height	2560	mm
Weight	5610	kg
ALTERNATOR		
Description	STAMFORD	
Alternator model	HCI5D	
P.R.P. Power	625.0	kVA
E.P. Power	673.0	kVA
Connection	Series star	
Phases	3FN	
Winding	311	
Terminal Number	12	nr.
IP Protection	23	
Electronic regulator	AS440	
Precision	1.0	± %
BASEFRAME		
Model	GV151/00/00	
Standard tank	800	Ι
Optional tank	0	I.
Oversized tank*	1800	I
CANOPY & SILENCER		
Canopy model	GV151/00/1	
Silencer model	MSR/a 125	

Standard reference conditions temperature 25°C, altitude 100m asl, relative humidity 30%. atmospheric pressure 100 kPa (1 bar), power factor 0.8 lag, balanced load - non distortional. Fuel consumption is nominal and refers to specific weight 0,850kg/l. Sound power values refer to free field conditions: the installation site may influence the values. Dimensions, weights and other specifications contained in the technical data sheet and related attachments are nominal, subject to tolerances and refer to the model with standard equipment; any optional and additional equipment/accessories can modify weight, dimensions, performance. **P.R.P. Prime Power-Continuous power at variable load:** The power that a genset can supply in continuous service at a variable load for an unlimited number of hours per year while respecting the maintenance intervals established in the environmental conditions stated by the Manufacturer, according to ISO8528-1. The average power supplied over time and any applicable overload must be less than the percentages stated by the Manufacturer. **E.P. - Emergency power:** This is the maximum power that a generating set can deliver for a limited number of hours per year while complying with the maintenance frequency stipulated under the environmental conditions set by the Manufacturer. The number of hours per year is determined by the engine manufacturer. The average power output over time must be lower than the percentages set by the engine manufacturer. Overloading is not allowed.

The data contained in this document is nominal and refers to the standard equipped model and is not binding. Visa S.p.A. reserve	es the
